

**37th Annual Field Recording Workshop  
Friday-Sunday, June 23-25, 2023  
San Francisco State University Field Campus, Yuba Pass, CA**

This workshop will be held at the Sierra Nevada Field Campus of San Francisco State University, beside the scenic north fork of the Yuba River. Participants will learn recording techniques hands-on in the field, visiting Sierra Nevada Mountains soundscapes in marsh, meadow, and forest.

The workshop has intensive one-on-one instruction with a variety of equipment and field techniques as well as lectures, and the opportunity to meet people with backgrounds in a variety of different professions.

The event will offer informative lectures and field trips by experienced sound recordists including:

- Microphone Array Comparison
- Build your own windscreen
- Adopt-a-Park round table discussion

Audio Engineers Dan Dugan, Ernst Karel, Mark Lipman, Steve Sergeant, and Greg Weddig, who have "adopted" national and local parks, will discuss how cooperating with park research programs provides opportunities to make recordings with both scientific and artistic value.

The cost for the Workshop is \$450 which includes tent platform lodging, all meals, and a year's membership. Recording equipment will be provided for those without.

Please download the registration form from this link:
